Welcome to the National Family Justice Center Alliance January Webinar!

While waiting for the presentation to begin, please read the following reminders:

- The presentation will begin promptly at 10:00 a.m. Pacific Time
- If you are experiencing technical difficulties, email natalia@nfjca.org
- To LISTEN to the presentation on your phone, dial (415) 363-0076 Access Code:
 993-614-748 or listen on your computer speakers
- Attendees will be muted throughout the presentation
- To send questions to the presenter during presentation:
 - Click on "Questions" in the toolbar (top right corner)
 - Type your comments & send to presenter
- There will be a Q & A session at the end of the presentation.
- The presentation will be recorded & posted on <u>www.familyjusticecenter.com</u>
- Please complete the evaluation at the end of the presentation. We value your input.

Your host today:

Gael Strack, J.D.
CEO

Advanced Strangulation Course

- Only course of its kind!
- February 4 7, 2014
- San Diego, CA
- This four-day course is open to multidisciplinary professionals working with surviving victims of near-fatal strangulation
- To learn more and register, go to: <u>www.familyjusticecenter.com</u> or <u>www.regonline.com/strangulation</u>

2014 International Family Justice Conference – San Diego April 2-4, 2014

Webinar Download Reminders

This webinar presentation is being recorded and will be posted on our website by close of business

If you would like to access our new Resource Library, please visit our website at www.familyjusticecenter.com and click on "Resources" tab → "Resource Library".

California Continuing Education

- This session is approved for .5 Continuing Education Units (CEU). The Family Justice Center Alliance is a California approved provider of CEUs for MFT, LCSW, LEP, LPCC (Provider #5095)
- Professionals in states outside of California should check with their own state board to determine whether these credits are approved in their jurisdiction.
- A checklist detailing how to obtain the credit will be included in the course materials and available for download.
- The checklist will also be emailed after the webinar training.

Today's Presenters:

Sara Wee, MPH
Public Health Program Associate,
National Family Justice Center Alliance

Dr. Ralph Riviello, MD, MS, FACEP
Professor, Drexel University College of
Medicine; Director, Division of Forensic
Emergency Medicine, Department of
Emergency Medicine

Addressing the Health Needs of Survivors: Scope of the problem Part I

Agenda

- Review the literature
- Overview of Alliance Health Initiative & Health Survey results
- Medical perspective and current practices
- Identifying chronic/unmet health needs
- Present available health assessment tools
- Strategies for engaging the Health Sector

Learning Objectives

- List at least three major health consequences of domestic violence.
- Describe the role multi-service organizations can play in addressing health.
- Identify key indicators of unmet/chronic health needs and health assessment tools.
- Articulate accomplishments and gaps in healthcare screenings for DV.
- Increase understanding about the healthcare sector and engaging them as partners.
- Describe how you can apply assessment tools, health resources, and/or program models to your FJC or organization's scope of work.

- Who do we have with us today?
 - Advocate or DV professional
 - Counselor/Therapist
 - Medical Professional
 - Law Enforcement, Attorney, Prosecutor
 - Other

- Have you received training on health and domestic violence?
 - Yes
 - No

 How comfortable are you in supporting the long-term, chronic, or "non-acute" health needs of survivors?

1= Not at all Comfortable

2= Somewhat Comfortable

3= Fairly Comfortable

4= Very Comfortable

- Affects nearly every aspect of health:
 - Injury
 - Indirect effects via chronic stress
 - Poor pregnancy outcomes
 - Self-report lower health than average
 - Engage in health-risk behaviors (coping)

3 times

more likely to have reproductive health complications than non-victims.

| | DV | No DV |
|------------------------|-----|-------|
| Chronic Illness (%) | 88% | 70% |

48%

of women who are abused will also experience depression.

Are more likely to suffer from

Postpartum depression

"Women who are abused are frequently treated within healthcare systems, however, they generally do not present with obvious trauma, even in accident and emergency departments."

(Campbell, 2002)

•9 to 22% of abused women will seek medical treatment at some point.

•DV victims make up a significant proportion of people using **Emergency Rooms.**

•Health care costs are over **2X** that of never-abused women (>\$4,500).

•A recent update estimates economic costs from IPV at \$8.3 billion.

(Duterte et al., 2008; Reisenfhofer & Seifbold, 2012; Jones et al., 2004; CDC, 2013).

Affordable Care Act guarantees screening and brief counseling for DV in Women's Preventive Services Guidelines:

(Health Resources & Services Administration)

When asked, victims are 2x as likely to disclose abuse to providers.

(Rhodes et al., 2012)

FJC Directors Webinar

Info Graphic: What you need to know about the ACA

Gaps

DV screening by "IPV specialists" (navigators) improved victim satisfaction with healthcare.

•Screening was not sustainable when the specialist was removed.

Dental care is a high area of need: 70% report a need.

Only 13% were asked about needs.

Screening in clinical setting increases the identification of DV.

•Not sufficient evidence to show increases in referrals to service orgs, enhanced safety.

Home visitation programs (e.g. Nurse Family Partnership) are well-equipped to provide for DV assessment and on-going care for basic health needs.

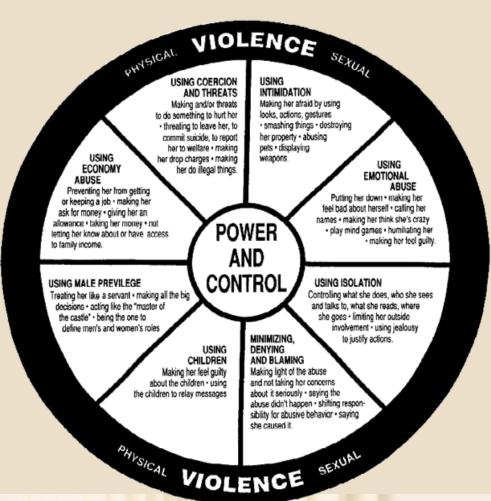

•DV advocacy training, organizational support, and addressing medical mandated reporting are needed.

Why care?

Advocates:

- Long-term safety
- Economic Abuse
- Generational Cycle of abuse

Why care?

Health Care Providers

- Long-term consequences (strangulation)
- High-frequency healthcare users
- High healthcare costs
- Compliance with health maintenance
- Patient-provider communication (traumainformed care)

Help survivors understand what they're experiencing.

Health can be a tool FOR empowerment.

Health Initiative: An idea

Medical Expert Focus Group:

- On-site health clinics are possible.
- Organizations with forensic medical units or SARTs have the capacity to serve broader health needs.
- Each organization needs to tailor health services to their clientele – Identify a health priority.
 - Partnership building is a first and vital step.

Health Initiative: An idea

The purpose of our Health Initiative is to assess the health needs of survivors accessing FJC services, and use technical assistance to develop viable models for effective on- and off-site health services.

•Phase I: Study & Planning

•Phase II: Pilot model testing

•Phase III: Training & Technical Assistance

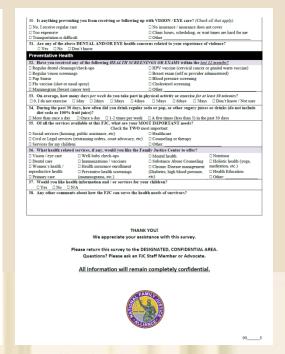

Health Initiative: Survey

Survey Objectives

- 1. Assess survivors' health needs/concerns.
- 2. Assess survivors' access and barriers to health services.
 - 3. Identify promising medical/health models for FJCs.

Alliance Health Initiative: Next Steps

- Pilot Site: Valley CARES FJC
- Documentation
- Annual FJC Conference,
 April 2 4, 2014
 - Breakout Session
 - Friday, April 4th
- Toolkits and Resources
- Expand!

TAKE THE FIRST STEP: Recommendations for FJCs and other Multidisciplinary DV Organizations

- Engage the health sector as new partners: Departments of Health, Health and Human Services Administration, local Hospitals and/or community health clinics, etc.
- Include key health questions into intake and partner agency assessment:
 - o Do you currently have a primary care provider?
 - o Have you been the ER in the last year?
 - o Do have health insurance/have you enrolled for health insurance under the ACA?
 - *Resources to address these questions need to be available.
- Establish protocols to expand assessment and support options for health concerns during follow-up, or after periods of crisis/trauma.
- Train staff and volunteers on non-acute and chronic health issues related to DV.
- **Establish a community Task Force** on Health and DV to tailor future programs and action steps for a FJC or community-based agency

The Medical Perspective

Introducing Ralph Riviello, MD, MS, FACEP!

- Benefits & Barriers to DV Screening by Health Providers
 - Current DV Screening Tools
 - Addressing Health Consequences
 - Engaging the Health Sector

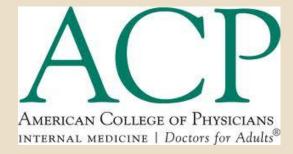

Benefits & Barriers to Routine Screening by Providers

Routine Screening Recommended by...

ACEP

- Emergency personnel assess patients for intimate partner violence, child and elder maltreatment and neglect.
- Emergency physicians are familiar with signs and symptoms of intimate partner violence, child and elder maltreatment and neglect.
- Emergency medical services, medical schools, and emergency medicine residency curricula should include education and training in recognition, assessment and interventions in intimate partner violence, child and elder maltreatment and neglect.
- Hospitals and emergency departments (EDs) encourage clinical and epidemiologic research regarding the incidence and prevalence of family violence as well as best practice approaches to detection, assessment and intervention for victims of family violence.
- Hospitals and EDs are encouraged to participate in collaborative interdisciplinary approaches for the recognition, assessment and intervention of victims of family violence. These approaches include the development of policies, protocols, and relationships with outside agencies that oversee the management and investigation of family violence.
- Hospitals and EDs should maintain appropriate education regarding state legal requirements for reporting intimate partner violence, child and elder maltreatment.

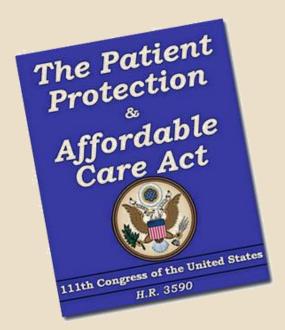

ACOG

- Screen for IPV in a private and safe setting with the woman alone and not with her partner, friends, family, or caregiver.
- Use professional language interpreters and not some- one associated with the patient.
- At the beginning of the assessment, offer a framing statement to show that screening
 is done universally and not because IPV is suspected. Also, inform patients of the
 confidentiality of the discussion and exactly what state law mandates that a physician
 must disclose.
- Incorporate screening for IPV into the routine medical history by integrating questions into intake forms so that all patients are screened whether or not abuse is suspected.
- Establish and maintain relationships with community resources for women affected by IPV.
- Keep printed take-home resource materials such as safety procedures, hotline numbers, and referral information in privately accessible areas such as restrooms and examination rooms. Posters and other educational materials displayed in the office also can be helpful.
- Ensure that staff receives training about IPV and that training is regularly offered.

Affordable Care Act

- Affordable Care Act requires many insurance plans cover certain recommended preventive health services without copayment, coinsurance or deductible.
- The Department of Health and Human Services (HHS) has adopted guidelines for women's preventive health services including screening and counseling for interpersonal and domestic violence.

Benefits of IPV Screening

- Identifying current or past abusive and traumatic experiences can
 - help prevent further abuse,
 - lessen disability, and
 - lead to improved health status.
- Because they are often trusted resources in their communities, health care providers are in a unique position to connect women who experience interpersonal and domestic violence with support.

Barriers to Screening

- 5 categories of barriers
 - Personal Barriers
 - Resource Barriers
 - Perceptions and Attitudes
 - Fears
 - Patient-related barriers

PATIENT-RELATED BARRIERS

- -Language barrier
- -Type of patient (psychosocial issues)
- -Patient attitudes prevent positive outcome from being achieved

- -Fear patient will stop seeing HCP
- HCP FEARS
 -Fear of police involvement
- -Lack of training on how to behave in these situations

- LACK OF RESOURCES
- -Inadequate follow-up resources
- -Inadequate support staff for victim education, safety planning, legal advocacy and referral
- -Inadequate screening procedures/awareness -Lack of office protocol

- -Abuse cannot be verified as patients do not reveal information during visit.
- -Fear of offending patient
 - -Concern for personal -Fear of safety making patient's life hard
- -Fear of partner's reaction to referral

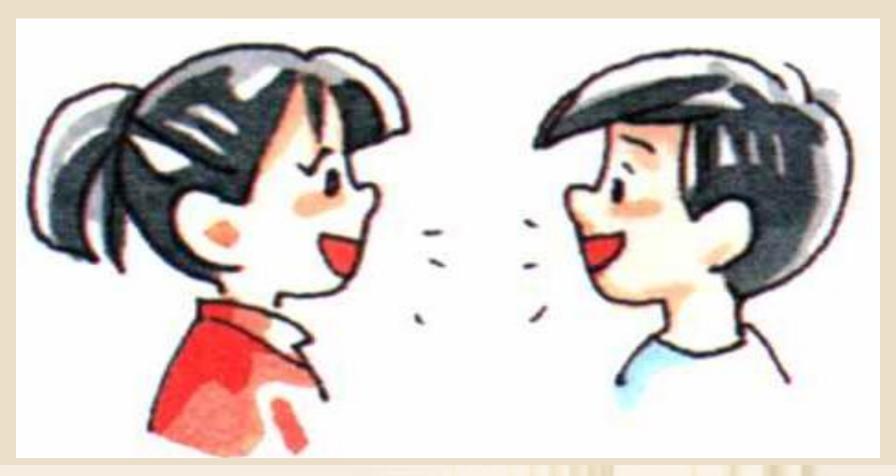

-Time constraints only allow for pressing issues to be addressed

- -Concern of misdiagnosis
- -Personal discomfort with issue
- -Personal history of abuse
- -Forgetting to ask about abuse
- PERSONAL BARRIERS

- -HCPs believe it is not their role to screen
- -Perception that abuse is rare
- -Woman is blamed for abuse
- -HCP believes patient is not aware of her rights

ATTITUDES AND PERCEPTIONS

Reducing Barriers

Reducing Barriers

SPEAK

- ED leadership
- Social Services
- Hospital Administrator

QUESTION

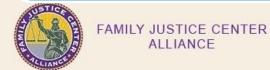

- DV screening policies in ED, hospital, health system, clinics, etc.
- If not present, why not?

EDUCATE

- Those you speak to on importance of DV screening and why their hospital needs to have it
- About DV services in the community and how YOU can help THEM

OFFER

- To provide staff training and education (ALL staff) and patient information
- To review current policies and procedures and to offer input
- To help create policy and procedure if ones don't exist

Comprehensive Approach

- Successful programs that increase IPV screening and identification take a comprehensive approach
 - Developing protocols
 - Training
 - Access to on and/or off site referrals and support services
- Futures Without Violence IPV Screening and Counseling Toolkit:
 - http://www.healthcaresaboutipv.org/getting-started/

Kaiser Health System Model

Systems Model for Intimate Partner Violence Prevention

Inquiry & Referral On-site IPV Services - Danger Assessment Inquiry & On-site IPV · Direct inquiry by clinician in any department Referral Services Safety Plan · Questions on health Triage to other mental history form health services Leadership & · Prompt included in elec-· Referral to other on-site Oversight tronic medical record or community resources Exam room poster prompts · On-site support groups Supportive Community discussion or advocacy services Environment · Materials describing services · Employee Assistance Prowhich patient can contact directly gram (EAP) resources for staff Supportive Environment Community Linkages

- · Batterers' groups

Engagement

- Start small (ED) and grow big (entire health system)
- Bring in all community partners
- Find a champion at each hospital/health system
- Meet regularly and monitor progress and have open and frank discussions about how process is or is not working

IPV SCREENING TOOLS FOR HEALTHCARE

Poll

- For medical professionals: Do you or does your hospital/clinic consistently screen for Domestic Violence?
 - Yes
 - No
 - Unsure

Poll

- For DV professionals: Are survivors you work with able to access needed health care?
 - -1 = No, not at all.
 - -2 = With great difficulty
 - -3 = Some/most of the time
 - -4 = Yes, excellent access!

Screening Tools

- Choose one appropriate for your patient population (may need more than one)
- Should be easy to administer
 - Clinician vs. Self
 - Paper vs. Direct Questioning
- Multilingual
- Integrated in health encounter

Screening Tools

- At least 34 different validated tools
- Common tools
 - HITS (Hurt Insult Threaten and Scream)
 - WAST (Women Abuse Screening Tool)
 - WAST-short
 - PVS (Partner Violence Screen)
 - AAS (Abuse Assessment Screen)
 - RADAR
 - Danger Assessment
 - UVPST (Universal Violence Prevention Screening Protocol)

| TOOL | # of Items | Validated Setting | Sensitivity/Speci ficity | Notes |
|----------------------|---|--|----------------------------|----------------------------------|
| HITS | 4-frequency of IPV | Family practice setting | Sens 86-96% Spec 91-99% | Validated in males |
| WAST | 7-physical and emotional IPV 8-SV | Females in Healthcare settings | NA | Self administered |
| PVS | 3—physical IPV and current safety | Clinic and Females and males in ED | Sens 64-71% Spec 80-84% | |
| AAS | 5-frequency and perpetrator of IPV | Pregnant and nonpregnant women; clinic | Sens 93% Spec 55% | |
| RADAR | 5 | Male and female doctor office | NA | MD administered |
| Danger Assessment | 15-homicide danger by male partner | Healthcare and battered women shelters | NA | Self administered |
| UVPST | 7-PV, SV, and fear of hurt | Women and Men ED | NA | RN administered Includes framing |

HITS

HITS

Hurt, Insult, Threaten, and Scream

How often does your partner physically Hurt you?

How often does your partner Insult or talk down to you?

How often does your partner Threaten you with physical harm?

How often does you partner Scream or curse at you?

WAST

AAS

Abuse Assessment Screen

| Instructions: | Circle | Yes or | No | for eacl | n question |
|---------------|--------|--------|----|----------|------------|
|---------------|--------|--------|----|----------|------------|

- 1. Have you ever been emotionally or physically abused by your partner or someone important to you?

 YES NO
- 2. Within the last year, have you been hit, slapped, kicked or otherwise physically hurt by someone?

 YES NO
 If YES, who? (Circle all that apply)
 Husband Ex-Husband Boyfriend Stranger Other Multiple
 Total no. of times _______
- 3. Since you've been pregnant, have you been slapped, kicked or otherwise physically hurt by someone?

 YES NO
 If YES, who? (Circle all that apply)
 Husband Ex-Husband Boyfriend Stranger Other Multiple
 Total no. of times

ACOG Tool

- "Because violence is so common in many women's lives and because there is help available for women being abused, I now ask every patient about domestic violence:
- Within the past year -- or since you have been pregnant -- have you been hit, slapped, kicked or otherwise physically hurt by someone?
- Are you in a relationship with a person who threatens or physically hurts you?
- Has anyone forced you to have sexual activities that made you feel uncomfortable?"

If Screen Positive...

- The provider can provide *brief counseling to*:
- 1) assess/promote the patient's immediate safety;
- 2) discuss the possible relationship between current or previous interpersonal and domestic violence and the patient's health concerns; and,
- 3) link the patient to support services and resources. THIS IS KEY!!

IPV AND HEALTH CONSEQUENCES: ASSESSING NEEDS

Health Consequences of IPV

- Many identified
- The longer the violence, the more serious the effects
- Acute Health Consequences
- Chronic Health Consequences
- Harmful Health Behaviors

Acute Health Consequences

- Injuries: cuts, lacerations, contusions, bruises, fractures
- Strangulation injuries
- May be more serious injuries
- MOST of these, seen and treated in ER
- An opportunity for intervention through screening and referral

Chronic Health Consequences

- Chronic Pain
- Chronic Pelvic Pain
- Heart disease
- PTSD
- Flashbacks
- Insomnia
- Psychosomatic disorders
- Eating disorders

- Depression
- STDs
- HIV
- Kidney infections
- Pregnancy complications
- Asthma
- Migraines/Headaches
- Etc, etc, etc....

Chronic Health Consequences

- Often the underlying cause (i.e., the DV) is never identified by the treating provider
- May lead to multiple tests, expenses, unnecessary treatments, etc., without a diagnosis and treatment for the real problem
- May cause patient/survivor to "doctor shop" to find the cure and the above cycle continues

Harmful Health Behaviors

- Smoking
- Alcohol abuse
- Drug abuse
- Risky sexual behaviors
- Not seeking health maintenance
 - Medical
 - Dental
 - Vision

Health Screening at FJC's

- No great tool exists for overall health screening
- Lots of tools for specific disease/condition screening
 - Appropriateness in this setting?
 - Cumbersome
 - Not designed for non-medical personnel use
 - Which ones do you screen for?

FJC Approach

- Be general with your questions
- Use framing statements
 - We often see that violence can affect health...
- Make it feel normal and part of the process

Examples: Alliance Pilot Project

• Framing statements (Clinical Guidelines, Futures):

"We often see that health is affected by violence, regardless of the type of abuse, so I just have a few questions that we ask everyone so that we know we are supporting all your needs..."

Danger/Risk Assessments

 Use probes to address potential health concerns when survivors screen positive for health-impacting risk factors (i.e. reproductive coercion, increased violence, strangulation...)

Safety Planning & Follow-up

- Stage your assessment and support for "non-acute" health needs
- E.g. Create medication plan (more later!)

FJC Approach

- Ask about their basic health
 - Do you have a Doctor? Dentist? Eye doctor?
 - Do you see them regularly?
 - When was your last visit?

Examples: Alliance Pilot Project

Ask key health questions:

| Yes | No | |
|-----|----|---|
| | | Do you currently have a primary care doctor? |
| | | If yes, when was your last visit? |
| | | Have you been to the ER in the last year? |
| | | Do you have health insurance? |
| | | Do you have any current concerns about your health? |

Address potential gaps in care:

| _ | Checklist (for advocate/counselor) |
|---|---|
| | Do you take any medications? Are you currently taking them? |
| | Do you receive counseling services? Have you ever? |
| | Are your pap smears/tests up to date (female)? |
| | Do you receive regular care for any health issues (high blood |
| | pressure, diabetes, pain, arthritis, etc.)? |

*Note: can be done on paper, or as oral follow-up.

You decide which when, where, and how to ask questions

Screening

- Have you been told you have any medical problems?
 - Develop specific questions for common conditions to assess the need for prompt medical attention
 - Diabetes
 - Coronary Artery Disease
 - High blood pressure
- Have you been diagnosed with depression, Bipolar disorder, or Schizophrenia?
 - Develop specific screening questions or use current tools to assess the need for prompt medical attention

Diabetes

| | NO | YES |
|--|----|-----|
| 1. Do you regularly check your sugar? | | |
| 1a. Is it usually high? | | |
| 2. Are you urinating a lot? | | |
| 3. Are you drinking a lot of fluids/ constantly thirsty? | | |
| 4. Do you take your medications? | | |
| 5. Do you have your glucometer with you? | | |
| If yes, ask them to check their sugar. | | |

Protocol: Yes answers to question 2,3, and/or blood sugar reading greater than 300, client should be referred to the ER for treatment

Mental Health

| | YES | NO |
|---|-----|----|
| 1. Do you currently want to hurt yourself? | | |
| 1a. In the last 12-24 hours have you done anything to hurt yourself? Explain: | | |
| 2. Do you currently want to hurt someone else? | | |
| 3. Are you currently hearing voices? | | |

PROTOCOL:

- 1. Use above screen for any person reporting history of depression, bipolar disorder, or schizophrenia.
- 2. If YES response to any question, refer to ER or Crisis Intervention Center
- 3. Consider EMS or police response

Screening

- Are you or could you be pregnant?
- Are you supposed to be on medications?
 - Do you take them regularly?
 - Do you have them with you?
 - How do you pay for them?
- Do you feel you are in need of medical treatment now?

Pregnancy

| | YES | NO |
|---|-----|----|
| 1. Are you currently pregnant? | | |
| 2. Have you received pre-natal care? | | |
| 3. Are you having any vaginal bleeding? | | |
| 4. Are you having any belly pain? | | |
| 5. Did you experience any belly injury today? | | |
| 6. Could you be pregnant? | | |

PROTOCOL:

- 1) If YES response to questions 1, 3, 4, or 5 refer to hospital ER
- 2) If YES response to question 6, refer to FJC clinic tomorrow for testing?

Review

- Establish primary health needs.
- Build survivor awareness.
- Integrate screening/assessment into advocacy and safety planning.
- Use framing statements.
- Determine appropriateness of screening.
- Have ready health resources/referrals.

Strategies for Engaging the Health Sector

Poll

- In your community, do the Health & DV systems work with each other?
 - Yes
 - No
 - Unsure

Challenges

- May be difficult and need LOTS of creativity
- Potential barriers: real and perceived
 - Willingness to help/provide service
 - Availability of providers
 - Accessibility to provider
 - Space (on-site, off-site, multipurpose)
 - Services to provide
 - Start up costs, equipment costs, acquisition
 - Regulations (state, DOH)
 - Insurance (malpractice, client health insurance)

First Steps

- Assess needs of clients you serve to see what you should focus on first
- Develop medication plan for patients who need them
 - Best solution may be ED or Urgent Care Center
 - Involve pharmacy
- Decide what will work for your center
 - On-site vs. Referral
- Work with medical community to see how to best provide these services
 - On-site services may be difficult and cumbersome to set up
 - MOUs with providers (include pharmacies, medical supply companies) in the community to provide their services for free or at reduced rates, prompt appointments and access, medication refills, etc.

Creative Strategies

- Partner with Medical, Nurse Practitioner, Optometry, or Dental Schools to provide on-site services using their students (they will be supervised)
- Look toward teaching hospitals with residencies for patient care
- Partner with local Federally Qualified Health Centers or other clinics to provide off-site care
- Partner with other local agencies: DOH, Planned Parenthood (pre-natal care), Susan G. Komen foundation (mammograms).
- Partner with local providers for special needs.
 - Local ENT offers to provide free laryngoscopy to all strangulation victims within 24 hours of assault or with persistent symptoms.
 - Local optician provides free eye exams to all women at your center

Review

- Determine your needs.
- Understand challenges facing the health sector.
- Advocate for survivors' needs.
- Start small build relationships and harness resources.
- Get Creative!

Poll

- What services are you interested in learning about / bringing to your organization?
 - Health screenings/training (advocates)
 - DV screenings (medical)
 - Building partnerships between health/DV sectors
 - On or off-site medical/health services
 - Other: please write in chat box

Wednesday, February 19th 10 – 11:30am PST

Part II

Creating Solutions: Addressing the Health Needs of Intimate Partner Violence Survivors in Family justice Centers

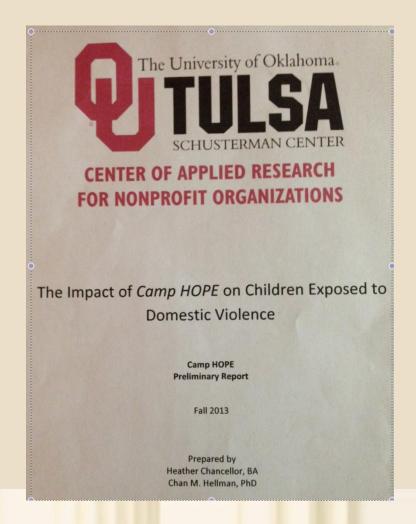

with Futures Without Violence

Camping and Mentoring

- What will you do together besides intervention?
- What will your prevention strategy include?
- How can the Camp HOPE California model benefit your children receiving services after exposure to DV?
- OU- Tulsa Evaluation Report 2013 – Camping and Mentoring Produces HOPE in Children!
- HOPE Scale Pre-Post: 25.5 to 27.6

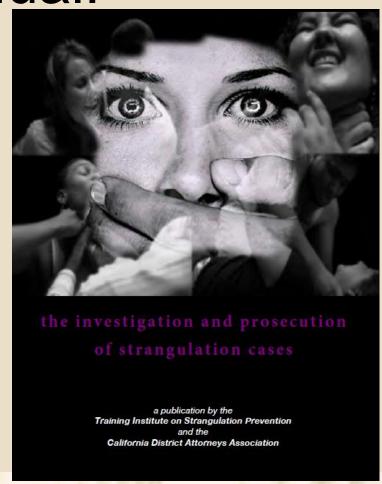

Alliance Publishes New Manual!

IPV Strangulation Crimes

- IPV Strangulation Crimes Manual – Developed by the National Family Justice Center Alliance/Training Institute on Strangulation Prevention
- In Partnership with the California District Attorneys Association
- Manual includes chapters on advocacy, investigations, prosecution, and legislation, among other topics

New iPhone APP

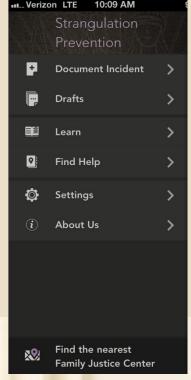

"Document It"

A Mobile App to Document Near-Fatal Strangulation Cases
The mobile application will assist professionals from *all disciplines*and individuals who are "choked" by an intimate partner to document

multiple incidents using:

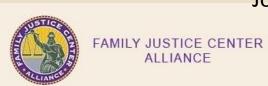

- Photo, Video, and Audio capture
- User-friendly survey of possible symptoms and injuries
- Text area to tell the story of the incident
- Signed consent for release of information; and
- Ability to send a full report to law enforcement
- Confidential storage
